DETAILED ACTION

Reasons For Allowance

1. Claims 31-52 are allowed.
2. The following is an Examiner's statement of reasons for allowance:
3. The cited prior art taken alone or in combination fails to teach the claimed invention of manufacturing, as claimed by Applicant. Specifically, independent claims 31, 48, and 51 disclose a validator for validating the relationships between nodes. Examiner interprets this to mean a system that will determine if the relationship between nodes in the model is the same as the relationship between nodes in actuality.
4. The closest prior art of Chavez, Jr. (U.S. Patent Number 5,550,896; dated 27 August 1996; class 455; subclass 411) teaches a structure of nodes that store authentication information but fails to teach or suggest a validator for validating the relationships between nodes.
5. Further, independent claims 36, 49, and 52 disclose an input for qualitative definitions of inputs.
6. The closest prior art of Chavez, Jr. (U.S. Patent Number 5,550,896; dated 27 August 1996; class 455; subclass 411) teaches a structure of nodes that store authentication information but fails to teach or suggest an input for qualitative definitions of inputs.

Art Unit: 2129

7. To the extent that these features do not exist in the prior art cited by Examiner, the present case is held to be allowable over the art of record.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
